

SPEEDY STRUT®

COMPLETE STRUT ASSEMBLIES
BY **SENSEN**

QUALITY!

- Premium components and strict manufacturing standards make SPEEDY STRUT® one of the best quality ride control options available.

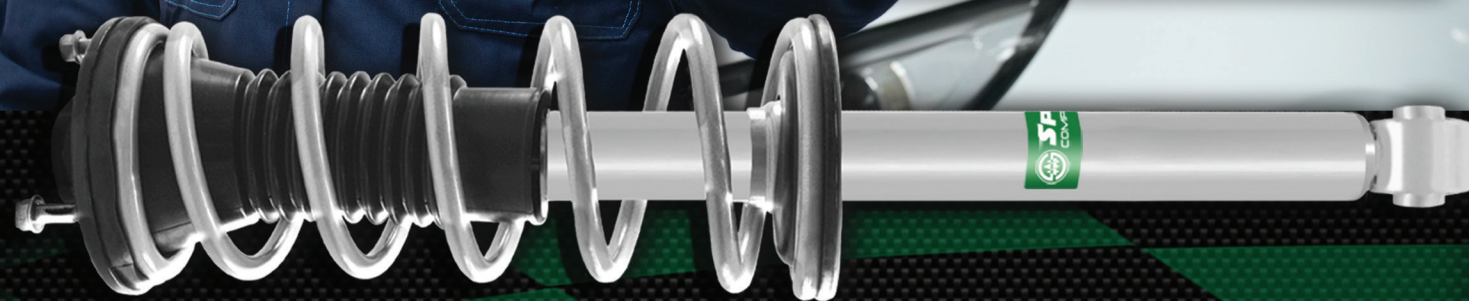

VALUE!

- Vehicle Owners**
SPEEDY STRUT® complete strut assemblies save the vehicle owner money. The complete unit is more cost effective than buying the components individually. And, because SPEEDY STRUTS® are completely assembled, installation time is reduced which saves time and money.

- Installation Professionals**
SPEEDY STRUT® installation can save 50% or more on repair time versus traditional strut replacement. This results in shorter wait times for customers and more time to repair other vehicles.

SAFETY!

- SPEEDY STRUTS® are pre-assembled at the factory and do not require the use of a spring compressor. They provide a safer installation alternative for DIY consumers AND service professionals. And, Speedy Struts include all of the important components. Installers and vehicle owners can be confident of a complete repair by replacing the strut, coil spring, and strut mount together.

Sometimes you get more
than you pay for!

4 INDICATORS THAT SUGGEST IT MAY BE TIME TO REPLACE YOUR RIDE CONTROL

01

Rough or Uneven Ride

Poorly performing or failed shocks and struts can cause suspension noise, roll, and excessive bounce leading to poor ride quality. Any or all of these conditions should merit inspection and potential replacement of the affected components.

02

Nose Dive

Stopping distance can be affected by excessive nose dive. Nose dive may increase due to worn shocks and struts.

03

Tire Wear

Cupping and uneven wear on tires may be an indication that the shocks and struts are not performing properly. Evidence of unusual tire wear is cause for inspection and potential replacement of ride control components.

04

Damage

Visible damage to shocks and struts is cause for inspection. This includes signs of oil leakage. Oil leakage typically indicates a failed seal and is cause for replacement of the affected part.

Detailed Fitment, In-Stock Status, Product Specifications, and Part Photos Available at sensen.mycarparts.com

Premium Grade Strut Mounts, Bearings and Proprietary Rubber Materials

SAE-Grade 8 Mounting Hardware

Dust Boot and Jounce Bumper
(Designed for Long Lasting Protection, Durability and Strength)

Heavy Gauge Tube Wall Thickness

Double-Lip Premium Oil Seal

Professional Powder-Coat Paint Finish for Long-Lasting Corrosion and Rust Protection

OE Grade Steel Coil Springs

Heavy Gauge Spring Seat

Fully Chromed Piston Rod

Premium Quality, Seamless Twin Tube Design
(Improved Product Strength)

PTFE Coated, Sintered Iron Piston

All-Weather Shock Oil
(Performs in a Vast Range of Temperatures)

Modern, Progressive Disc Valve Technology
(Consistency at Varying Speeds and Road Conditions)

Solid Steel Eye-Ring
